WORK EXPERIENCE

Software Developer Associate
Tata Consultancy Services

11/2021 - Present

Description:

- Spearheaded Workday Technical Consulting, specializing in API, REST, and SOAP services, focusing on integration management and comprehensive software development.
- Applied technical proficiency to enhance and optimize Workday ERP systems.
- Leveraged Full Stack Development skills (JavaScript, HTML, CSS, Node.js, Java) to deliver innovative solutions.
- Collaborated with cross-functional teams to streamline processes, ensuring seamless integration of web-based applications.
- Engaged in continuous learning and professional development, transitioning from Workday specialization to becoming a proficient Full Stack Developer.

Freelancing - Full Stack Developer
Ameen Works

06/2023 - Present   *Chennai, TN*

Crafting innovative digital solutions with precision and passion.

Responsibility:

- In addition to my TCS role, I freelance in Full Stack Development. Proficient in JavaScript, HTML, CSS, Node.js, and Java, I craft tailored solutions using React, Redux, Context, JWT, Nodemailer, Firebase, and custom APIs. Successful project execution showcases my commitment to high-quality, user-centric applications, refining technical skills and adaptability.
- Whether designing dynamic front-end interfaces, architecting robust back-end systems, or ensuring seamless integrations, I maintain a client-focused approach.
- Passionate about transforming ideas into functional, scalable, and visually appealing web applications, I actively seek new freelance opportunities. Open to collaborations, let's connect to discuss how I can contribute to your next project's success.

EDUCATION

Bachelor of Engineering - Mechanical
Anna University

07/2017 - 06/2021   *CGPA: 9*

SKILLS

React   Redux   HTML5   CSS3   NodeJS

Full Stack Development   JWT   Webservices API

JAVA

PERSONAL PROJECTS

Realtime Project: Fitra App (08/2023 - Present)

- Actively contributing to the development of Fitra App, a real-time project designed for scenarios such as flood relief and charity initiatives. Responsible for implementing features to track stock details of distributed commodities, monitor product deliveries, and manage recipient information.
- Additionally, integrating a sponsor module to capture vital fund support details. Leveraging a comprehensive tech stack to ensure seamless data management and reporting, aiming to enhance the efficiency of charity and relief operations.
- Technologies: Firebase, React, Redux JS, JWT, Node JS, Node Mailer, Express JS, Mongoose, MongoDB, APIs, Middleware Services.

Full Stack Project: Stack-overflow Clone (07/2023 - 08/2023)

- Led the development of QHub, a full-stack project mirroring the functionality of Stack Overflow. Leveraged Node.js, Express, Mongoose, MongoDB, and Firebase for robust user authentication. Implemented features for collaborative Q&A, showcasing proficiency in back-end development, database management, and user authentication.
- Achieved seamless integration between front-end and back-end components, demonstrating a comprehensive skill set in full-stack web development.

Front End Project: YouTube Clone (06/2023 - 06/2023)

- Developed a front-end project as part of the Full Stack Development course. Created a YouTube clone, showcasing proficiency in UI design and data fetching through Google APIs. Applied skills in HTML, CSS, Google APIs, Bootstrap5 Material UI and JavaScript to deliver a responsive and visually appealing user interface.

HONORS

Feedback Enabler -TCS (09/2023)

Proficient in fostering innovation and driving positive change. Dedicated to enabling transformative solutions, contributing to a culture of continuous improvement. Eager to catalyze growth and success in future endeavors.
